<p>COMMENTS ASSIGNMENT #1:</p> <p>Application doesn't compile with multiple errors. The query to get logs is not considering the controller. Execution time property is redundant. Missing googlebot filter. Modal window is not re-usable. Modal window doesn't render the button. Boolean extension method doesn't work as expected.</p>
<p>COMMENTS ASSIGNMENT #2:</p> <p>Reservations are not being seeded correctly. Missing Query #1. Missing Query #2. Missing Query #3.</p>
<p>COMMENTS DELIVERABLE #1:</p> <p>Clicking on dashboard shows error. Would be better if you could remove things from the UI that are not being used. Missing authorization for MyProjects. Missing authorization on the Get action for create project.</p>
<p>COMMENTS DELIVERABLE #2:</p> <p>There should be only one list of tickets. Only admins and project managers should be able to change the status of the ticket. Missing the proper permissions to edit tickets. The permission logic for the admin or project manager to add attachments or comments is wrong.</p>
<p>COMMENTS DELIVERABLE #3:</p> <p>Update-database shows error: Sequence contains no elements. Code to generate history can be improved. It doesn't look like adding admins to ticket notifications is working.</p>
